- City Surveillance
- Parking and Access Control

Elevating Traffic Management Efficiency with Reliability

Reliable Traffic Management Solutions for a Safer Tomorrow

In the realm of traffic management, the need for reliability and dependability is paramount. VIVOTEK recognizes the pivotal role that efficient traffic management plays in our daily lives. That's why we're excited to introduce our suite of solutions, focusing on reliability, scalability, and integration.

Leveraging our extensive experience in transportation monitoring, VIVOTEK brings a dedicated approach to traffic management. Our commitment to safety and security is unwavering. Our Traffic Management Solutions are designed to meet the intricate demands of traffic projects.

Explore our solutions today as we strive to make our roads safer and traffic management more efficient.

Scale with Edge Analytics

VIVOTEK provide network cameras with on-device analytics to lower the total-cost-of-ownership (TCO) and improve scalability. Edge analytics reduces the needs for expensive hardware and software, at the same time, enable the project to scale by camera as-a-unit, minimize any idle computing power.

Diverse Protocol for Integration

VIVOTEK cameras provide extensive set of APIs to integrate with any traffic analytics software and management platform. This makes it effortless to receive comprehensive traffic data, crisp video, and device status and information.

Design Flexibility and Customizations

In order to satisfy the unique needs of our customers in the traffic management sector, VIVOTEK offers great flexibility of product customizations. Combining any lens, cabling options or more complex firmware and hardware modifications, our project consultants are ready to offer a solution based on individual project needs.

Long-term Product Support

With full consideration of the long-term perspective of traffic deployments, VIVOTEK carefully plans products life-cycle and ensures compatibility of future product generations about technical specifications and dimensions in order to streamline project maintenance.

Embark on the Journey with VIVOTEK Traffic Solution

P. 5

Traffic Management

Ensuring the safety and smooth flow of urban transportation.

P. 7

City Surveillance

Enhancing public safety through comprehensive monitoring and analytics.

P. 9

Parking and Access Control

Streamlining management and ensuring a seamless and secure experience.

Traffic Management

- Automatic Intervention for Traffic Incident
- Efficient Traffic Management
- Edge-AI License Plate Recognition

VIVOTEK Traffic Management offers a range of AI-capable cameras equipped with comprehensive APIs for seamless integration. In collaboration with our partners, we deliver high-quality, 24/7 surveillance footage that autonomously identifies and alerts authorities to irregularities, optimizes resource allocation, and substantially mitigates traffic congestion and disruptions, whether on highways or within urban areas.

Stop & Go application

City Surveillance

- Automated Law Enforcement with Edge Analytics
- Centralized Monitoring

VIVOTEK City Surveillance not only deters crimes, accidents, and vandalism but also enhances traffic management efficiency while capturing valuable forensic evidence. Our city surveillance solutions, with a range of camera options, ensure continuous and detailed coverage. They are compatible with most VMS platforms and feature embedded AI Analytics for automated detection, providing peace of mind for metropolitan areas.

Parking and Access Control

• Edge Analytics • Seamless Integration of Vehicle Information

VIVOTEK's Parking & Access Control Solution consists of edge LPR cameras, VAST Security Station (VSS) VMS, and accessories, offering the highest level of secure access control. By automatically matching identified license plates and integrating with third-party access control systems, VIVOTEK's Parking & Access Control Solution reduces labor costs and improves operational efficiency.

Smart VCA

Smart Motion Detection

Accurately identifies activities, regardless of variations in lighting, shadows, adverse weather, or other external factors. Smart Motion Detection significantly decreases the occurrence of false alarms, ensuring ongoing and intelligent protection of individuals.

AI-Powered Video Analytics

Our onboard Smart VCA suite features 8 advanced video analytics, empowering smart-edge cameras with superior capabilities for precise people and object detection. Its flexible configuration allows it to adapt to a wide range of user application needs.

Parking Violation Detection

Our Parking Violation Detection system can identify vehicles that have stopped in restricted areas. This technology is applicable in various scenarios, such as cars parking in unauthorized zones at the airport, bus and train stations, and bicycle lanes. By recognizing and flagging illegally parked vehicles, this system contributes to reducing traffic congestion.
